VISION ENGRAVING SYSTEMS ANNOUNCES ADA ASSISTANT SOFTWARE

Vision Engraving Systems (Phoenix, AZ) announces their new ADA Assistant software, which makes the creation of ADA-compliant signage faster and easier. This software package, which works directly with the company's Vision Pro software, helps the user ensure that all Braille and text used comply with federal standards.

This new software package offers several important features for ADA sign-making. First, the software scans all true-type fonts in the user's computer and recommends which ones meet the height and width ratio requirements necessary. It also automatically places Braille text with correct spacing, and recommends auto-sizing of text for overhead signs based on viewing distance. In addition, the software includes all standard pictorial symbols used with ADA signage, and provides the user with an auto-alert notification for any non-compliant signs, showing what areas need correction. For more information, please contact the Vision sales office at (888) 637-1737 or visit online at www.visionengravers.com.

***About Vision Engraving Systems:** VISION ENGRAVING SYSTEMS manufactures a complete line of computerized engraving and routing systems. With over 25 years in business, Vision has established a reputation for the highest quality engraving products. Proudly made in the USA, Vision's product line offers a wide range of rotary systems that will suit most any marking application. Vision Systems are used worldwide in industries such as trophies and awards, sign-making, advertising-specialties, corporate identification and promotion, die and plate making, personalized gifts and jewelry, product and parts marking, and many others. The Vision product line includes a variety of machines for a range of budgets and applications for business, from small-format and specialty engravers to large-format, heavy-duty engravers and routers. Vision's rotary systems include the company's own state-of-the-art electronics, which ensure efficiency and accuracy. Vision also manufactures an extensive line of engraving fixtures, clamps, and other work-holding devices that help engrave more effectively and efficiently.*
